

**PRODUCT INFORMATION**

**PRODUCT: DISC BRAKE QUIET**

**PART NO.: M609, M609C**

**FUNCTION AND APPLICATION: Stops disc brake squeal by the application of a water resistant cushioning film on back of disc brake pads.**

**OUTSTANDING PROPERTIES: The application of a durable, pliable film dampens vibrations which cause the annoying squeal associated with disc brakes when applied. Prevents "comebacks" on brake work.**

**USE DIRECTIONS: Remove pads and clean with a GUNK® BRAKE PARTS CLEANER. Shake can well. Spray DISC BRAKE QUIET evenly over the entire surface of the backing plate of the outboard pad. Spray one narrow strip of DISC BRAKE QUIET to the backing plate of the inboard pad. Allow to set for 30 minutes and reassemble unit, being sure to wipe off any excess that may be squeezed from under the backing plates during reassembly. CAUTION: DO NOT PUT DISC BRAKE QUIET ON FRICTION MATERIAL SIDE OF PAD OR ON ROTORS. CLEAN THOROUGHLY ANY ACCIDENTAL CONTACT.**

**PRECAUTIONS: View MSDS at [www.gunk.ca](http://www.gunk.ca)**

**STORAGE & HANDLING: Store in a dry, well-ventilated area below 50°C. Do not place can on hot surfaces or in direct sunlight which could cause can to burst violently and cause serious injury. Keep can from contact with electrical current or connections such as battery terminals because burn through may occur. Explosion or flash fire from vapors may cause serious injury or death. Do not puncture, crush or incinerate (burn) can. Keep away from children and animals.**

**DISPOSAL: Safeguard our environment. Dispose of container, residue and excess product in accordance with all federal, provincial and local laws and regulations.**

**PACKAGING: 225g Aerosol packed 12 per case.**

**U.P.C. CODE: 0-60959-13069-2**

**WEIGHT PER CASE: 10 lbs. 4.54 kg**

**CASE SIZE: 11 x 7 x 9**
